

# MACRO FISH

## THE REAL FISH

Shaper: Bufo

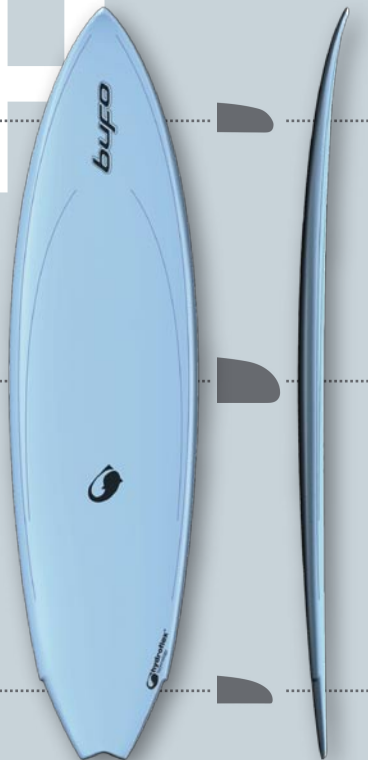

The Macrofish is a very versatile allround fish/funboard. The extra volume provides great paddle and wave catching ability.

A plain bottom shape and a forward wide point outline gives this board amazing drive with a good control in various conditions.

Due to its winged tail this board feels shorter than it actually is and offers excellent pocket performance.

This board is designed as a multifin surfboard which can be used as a twin, thruster, quattro and bonzer too.

It was tested in different surf from 1 foot / 30cm north sea up to solid head high in La Nord / Hossegor. The board offers the best of two worlds: The paddling and wave catching performance of a funboard goes hand in hand with the drive and maneuverability of a real fish.
