

# SHORT

## UGLY THE BEAST

Shaper: Bufo

It may be ugly, but you will love this board with extra volume in small to medium high surf.

It got its name from our teamriders who normally use super thin „Potato Chip“ Style Boards and didn't like the chunky look of this proven Magic Shape. They called it "ugly" but after testing it changed their mind.

Full boxy rails for an excellent performance in small to medium surf.

Very flat rocker in the centre combined with a flat Bottom shape in the nose area running into a slightly single concave up to the fins and ending into an ultra flat vee in the tail area to enable lots of drive to make flat sections on weaker waves. A real performer with extra volume for floatation and easy catching.
